

Jefferson County Community Pathway

Proposal Overview

~8.2 miles

What?

A paved, multi-use pathway separated from the road that connects Culver, Madras, and Metolius along Highway 361 in Phase 1.

Why?

To promote **health** and **community connectivity** and increase accessible, **safe transportation**; and to encourage **tourism** and **economic development**. The pathway also appears in community documents!

Who?

The Cities of Culver, Madras, and Metolius are collaborating with Jefferson County, COIC, and a number of other local community partners to develop this proposal.

How?

The Cities and County are applying to the Oregon Community Paths grant in September for \$200K. This will go towards a feasibility study and community outreach campaign. This request would require approx. \$20K in match, which partners plan to raise from other grants and some local funds.
